

Apurva Anand

Vellore | apurva.anand789@gmail.com | 9608393303 | LinkedIn | Github

Computer science undergraduate who enjoys building things that actually work. Strong in data structures, algorithms, and object-oriented programming, with hands-on experience building web and ML-based applications using Python, JavaScript, and TypeScript. Comfortable working on backend systems, databases, and APIs to turn ideas into usable products

Education

- VIT Vellore | B.Tech CSE | CGPA: 7.14 | 2022–2026
- The Pentecostal Assembly School | Class XII | 71.66% | 2020 - 2022
- The Pentecostal Assembly School | Class X | 84.2% | 2019 - 2020

Technical Skills

Languages: C++, JAVA, Python, SQL, JavaScript, TypeScript

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Design

Frameworks & technologies: React.js, Next.js, Node.js, Express.js, Django

AI & Machine Learning: Machine Learning, Generative AI, NLP, Computer Vision, FAISS

Database & Cloud: Microsoft Azure (AZ-304), AWS

Tools: Git, Docker

Experience

Intern, SAIL

May 2024 – July 2024

Certification

- Worked in an industrial environment to analyze operational data and support process improvement through technology-driven solutions.
- Developed data-processing and machine learning solutions to automate workflows, improving efficiency and reducing manual effort.
- Collaborated with engineering teams on data analysis, project implementation, and operational decision-making.

Projects

CareerLens | AI-Powered Job Recommendation System

Github

- Developed an AI-powered platform that analyzes resumes and recommends relevant job opportunities.
- Built semantic matching pipelines using vector embeddings to rank jobs based on resume-job similarity.
- Implemented skill-gap analysis and automated cover letter generation using LLMs.
- **Tools:** Python, FAISS, Sentence Transformers, spaCy, Gemini API, PostgreSQL.

PWAI-STEM | AI-Powered STEM Learning Platform

Github

- Developed an offline-first STEM learning platform with local caching and Firebase synchronization.
- Built a mobile-first interface with an AI-powered chatbot for personalized doubt solving and learning support.
- **Tools:** React.js, Tailwind CSS, Firebase Auth, Firestore, Service Workers, Google Gemini API.

SkinAI | AI-Powered Skin Analysis Platform

Github

- Developed an AI-powered application to analyze skin images and assess treatment requirements.
- Built computer vision pipelines for real-time detection and evaluation of skin conditions.
- **Tools:** Google Genkit, Generative AI, Computer Vision, Next.js, TypeScript.

Certifications

- **Docker for Beginners:** Certificate
- **Next.js Fundamentals:** Certificate
- **Search Engine Optimization (SEO):** Certificate
